

Manual Testing for demo.opencart.com

PROJECT TEST PLAN

Project: OpenCart E-commerce Platform

Version: 1.0

Tester: Eman Fatima

Date: July 2026

Environment: Chrome, Windows 11

URL: demo.opencart.com

OBJECTIVE:

Verify core e-commerce functionality including user authentication, product search, cart management and checkout process.

SCOPE (what we test):

- User Registration
- User Login
- Product Search
- Add to Cart
- Checkout Process

OUT OF SCOPE:

- Admin panel
- Payment gateway
- Mobile responsiveness

TEST TYPES:

- Functional testing
- Negative testing
- Boundary value testing

ENTRY CRITERIA:

- Website is accessible
- Test environment is ready
- Test cases are written

EXIT CRITERIA:

- All test cases executed
- All critical bugs reported
- No critical bugs open

TEST CASES TO REGISTER ACCOUNT

TC_ID: TC-REG-001

Title: Register with Valid details

Type: Positive

Precondition: User is on the Register page.

Steps:

1. Enter "Ava" in the first name field.
2. Enter "Chen" in the last name field.

Actual Result:

Product shows as available on product page. Out of stock warning (red stars) only appears at checkout stage after user has gone through entire process.

Status: Fail

BUGS FOUND:

Bug ID: BUG-001

Title: single character first name accepted

Environment: Chrome, Windows 11

URL: demo.opencart.com

Severity: Major

Priority: Medium

Precondition: User is on the registration page.

Steps to Reproduce:

1. The user fills its first Name as "A".
2. The user fills out the other fields successfully.
3. The user clicks the registration button.

Expected Result: It will show an error saying "First name is too short".

Actual Result: User has been registered with the single Character as a first name.

Impact: Invalid data is being stored.

Bug ID: BUG-002

Title: Empty search submits without validation.

Environment: Chrome, Windows 11

URL: demo.opencart.com

Severity: major

Priority: medium

Precondition: User is on the home Page and has internet connection.

Steps to Reproduce:

1. The user clicks on the search bar.
2. Instead of writing any product name, the user keeps it empty.
3. The user clicks on the search button.

Expected Result: It will show an error message saying "Please enter the product name".

Actual Result: it showed a message saying "There is no product that matches the search criteria."

Impact: The User will think it of bad user experience as it is not the valid message.

Bug ID: BUG-003

Title: No account lockouts after multiple failed attempts

Environment: chrome, windows 11

URL: demo.opencart.com

Severity: critical

Priority: high

Precondition: user is on login page.

Steps to Reproduce:

1. The user logged in with email "ava123@gmail.com" and password "wrongpass"
2. Repeat steps 1-2 five more times .

Expected Result: The account gets lockout or a captcha appears for multiple wrong attempts.

Actual Result: It keeps on accepting the invalid email or password.

Impact: Allows unlimited password guessing (brute force attack). Malicious users can systematically try all possible passwords until they gain access. Industry standard requires lockout after 3-5 failed attempts.

Bug ID: BUG-004

Title: Out of stock shown only at checkout

Environment: CHROME, WINDOWS 11

URL: demo.opencart.com

Severity: critical

Priority: high

Precondition: User has added the product in the cart.

Steps to Reproduce:

1. The user added the Nikon D300 in my cart.
2. Before going for checkout, the user clicks on the cart button.
3. The user proceeds to the checkout.

Expected Result: User will successfully land on the checkout page with the items in cart.

Actual Result: Items are showing out of stock when proceeded for checkout.

Impact: It has a really bad impact for the user experience. It is an inconvenience that at the last step, products are showing that they are out of stock.

Bug ID: BUG-005 (related to bug 04)

Title: All products out of stock on demo site

Environment: chrome, windows 11

URL: demo.opencart.com

Severity: critical

Priority: high

Precondition: User is on the product page.

Steps to Reproduce:

1. The user is adding multiple products in the cart.
2. The user clicks on the Cart button to check all the products.
3. The user proceeds the cart for the checkout.

Expected Result: The cart proceeds for the checkout and lands on the checkout page.

Actual Result: All the products are coming with an error that this product is out of the stock. and it can't proceed for checkout.

Impact: Entire e-commerce purchasing flow is broken. No customer can complete a purchase on the platform. 100% of potential sales lost.

Bug ID: BUG-006

Title: Checkout button non-functional

Environment: Chrome, windows

URL: demo.opencart.com

Severity: critical

Priority: high

Precondition: User has items in cart and is on cart page.

Steps to Reproduce:

1. The user has added multiple products in the cart.
2. Users click on the checkout button that is present on the top right corner.

Expected Result: By clicking, it will open the checkout page.

Actual Result: Nothing happens, no page opens up by clicking on the checkout button.

Impact: Critical business impact. Users cannot initiate the checkout process at all. Combined with BUG_005, the entire purchase flow is completely broken.
